

In Vivo Research Associate – Preclinical Research & Cancer Biology

Overview:

The Research Associate will conduct hands-on in vitro and in vivo experiments related to efficacy, pharmacodynamics, and pharmacokinetics with a wide variety of cellular biology, molecular biology, and biochemistry approaches. This position requires the ability to complete scientific and technical tasks independently on aggressive timelines, to troubleshoot technical issues, and to work as part of a team on multiple projects with changing priorities. Attention to detail, solid oral and written communication, and strong computer and instrumentation skills are required. Exact title and responsibilities will be commensurate with experience.

Responsibilities:

- Coordinate with Scientific teams to achieve company objectives, specifically through the execution of experimental designs
- Participate in study design and preparation of pre-clinical studies
- Fully support execution of pre-clinical studies
- Help in the preparation of study protocols and reports
- Conduct novel investigations into biochemical pathways as they apply to drug development
- Perform sample preparation and analysis with ex vivo tissues for assays (histology, protein, RNA, and DNA analysis)
- Contribute to the adaptation of existing assays and development of novel assays that comply with standards required of preclinical in vivo studies
- Proactively support lab function by ordering and maintaining reagents and supplies, troubleshoot technical problems and perform equipment maintenance
- Assist with operational management of the laboratory including procurement as well as interface with collaborators and external research teams
- Record and maintain accurate research documentation and perform initial analyses to identify non-conforming data points and/or interpret outcomes
- Prepare, process, and retain documentation required to maintain DEA-controlled substances license

- Assist in collecting and organizing study documentation from multiple researchers, such as notes, observations, and data, and enter them into a central database
- Prepare written summaries of data for peer review, and clearly communicate data at scientific presentations in departmental meetings
- Perform other duties as assigned, including maintenance and transfection of mammalian cell lines

Candidate Requirements:

- Bachelor's degree in pharmaceutical sciences, life sciences, pharmacology or related field
- Minimum 0-1 year relevant industry experience depending on education level
- Background in lab animal (in-vivo) research is a must
- Working knowledge of in vivo techniques and imaging modalities will be a plus
- Experience with aseptic/sterile technique, specifically for microbiology and mammalian cell culture will be a plus
- Position requires good communication skills, including MS Word, Excel, PowerPoint and attention to detail
- Strong work ethic, self-motivation, and ability to adapt in a dynamic team environment are keys for success

Must Haves:

- Previous hands-on experience with tumor implant, dosing, and injections.
- Hands-on experience with different types of injections: IM, SC, IV, and IP
- Experience with dosing, blood draws, and tissue collection

Benefits & Additional information:

We are dedicated to building a team of smart, enthusiastic, creative and self-motivated people passionate about science and curing cancer in a start-up environment. We offer the benefits of large pharma companies. Our employees and their dependents are eligible for medical, dental, vision, life and LTD insurance with a 90% - 100% company contribution. We provide a 4% automatic match to retirement savings and a generous amount of time off through our vacation, paid holiday, sick and floating time off programs (40+ days). Our employees also enjoy many other company perks, like free gym membership, monthly events, other supplemental benefits and cost-free work-life balance programs. We work at the state of the art, LEED-Gold Certified, GradLabs space with a brand-new laboratory, training rooms, and Cafe and lounge areas. Reasonable accommodation may be made to enable qualified individuals with disabilities

to perform the essential functions of our jobs.

We are an equal opportunity employer, celebrate diversity and are committed to creating an inclusive environment for our employees. We provide a work environment of mutual respect where equal employment opportunities are available to all applicants and teammates without regard to any characteristic protected by law.
